PROJECTS

PlayWise Kids – Kids Toys E-commerce

Live | Repository

Overview: PlayWise Kids is an e-commerce platform for educational and learning toys that lets users browse products, read detailed product info, and read related blog articles, while supporting Google authentication and a shopping cart.

Features:

- Users can browse products with pricing, discounts, and ratings, and view detailed product pages with FAQs.
- Users can sign in with Google (NextAuth.js) and add items to a shopping cart.
- Users can read blog articles related to each product and submit inquiries via a contact form with automated email notifications

Technology Used: React.js, Tailwind CSS, Firebase, Node.js, Express.js, MongoDB

DormMaster – Hostel Meals Management

Live | Client Site | Server Site

Overview: DormMaster is a hostel meals management system enabling admins to manage meal entries and users to view their meal requests, reviews, and payment history.

Features

- Admins can add, update, delete, and serve meal entries.
- Users can view their requested meals, reviews, and payment history.
- Admin and User can search meals.

Technology Used: Tailwind CSS, JavaScript, React.js, Firebase, Express.js, Node.js, MongoDB

ByteInSightHub – Technology Content Management

Live | Client Site | Server Site

Overview: ByteInSightHub is a tech blog site where writers can manage their posts, users can comment on articles, and sort or search blogs by category and title.

Features

- Only the blog writer can update or edit their posts.
- Commenting on articles and reading other comments.
- User can sort by category and search by blog title.

Technology Used: Tailwind CSS, JavaScript, React.js, Firebase, Express.js, Node.js, MongoDB
